

THE BETTER ALTERNATIVE TO BALL DECKS OR CLEAN RING ASSEMBLIES

REMESHING & RESCREENING SERVICES

HK's turn-key remeshing and rescreening services offers a 1-3 day turn around time, providing a quick solution to keep your operations running

PRODUCT DETAILS:

Improve your screening operations with our turn-key services for managing screen replacement.

HK ensures fast turnaround, quality work and competitive prices for replacing your worn out screens, lowering your overall cost of maintenance and reducing production downtime.

All major screener brands are supported, even if using their Ultrasonic de-blinding systems.

Common Brands we can convert include:

- Russell Finex
- Kason
- Sweco
- Midwestern
- Vorti-siv

BENEFITS:

- Lower cost of maintenance
- Reduced production downtime
- Allow your staff to focus more time on production
- High quality work by experienced craftsmen

ABOUT HK TECHNOLOGIES

An Affiliate of The Cleveland Vibrator Company

INDUSTRIES WE SERVE

3D Printing
Agriculture
Pharmaceuticals
Vitamin Production
Dry Chemical Processing
Powder Metal Production
Additive Material Manufacturing
Powder Coatings
Food & Beverage

COMMON APPLICATIONS

Particle Sizing & Separation
Solid/Liquid Separation
Check Screening
Particle Analysis
Sieve & Classify Dry Bulk Goods

HK Technologies provides production and laboratory sized vibratory sieves and ultrasonic vibratory sieves, handling both wet and dry applications down to 10 microns. HK's vibratory sieves can be used for sizing, fines removal or liquid/solid separation. HK's unique design for optional application of ultrasonic vibration outperforms sieve throughput of competitive units. Ultrasonic vibration can be applied as a retrofit conversion on most standard sized competitive vibratory screeners, sieves and sifters.

HK promises to deliver high quality products engineered and built using only the best brands of components recognized for quality and continuous duty. Brands include: Uras Techno Motors, Cleveland Vibrator Vibratory Aids, Yaskawa Controls, Firestone isolation mounts, Bopp Wire Cloth and Precision E Form sieves to name a few.

All sieves, sifters and screeners are designed with minimal wear parts to make maintenance an infrequent and easy task. Minimal contact parts allow for quick and easy clean up or screen changeover.

HK's fine mesh vibratory sieves and sifters are perfect for check screening applications and ensure a consistent, high quality product every time with removing oversize contaminants from your production batch.

MORE ABOUT THE BRAND & OUR HIGH QUALITY PRODUCTS

- Use of low-maintenance, continuous-duty rated vibrators ensure long and low-cost product life
- Flexibility in design options ensures a seamless fit into your existing production processes for your specific screening, sieving or sifting application
- Unique ultrasonic vibration transducer design utilizes full screen surface area, eliminates screen tearing issues of competitive units and significantly reduces screen blinding to improve throughput rates
- Ultrasonics significantly reduces blinding to improve throughput rates
- High quality construction, warranty and service
